

Quiet Night Hepa Filter Air Purifier with Sleep Mode

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Envitek
- Certification: ETL CB EMC LVD ERP ROHS
- Model Number: KJ050GE-C7
- Packaging Details: color box+master carton
- Delivery Time: 30
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 30000 PCS/MONTH

Product Specification

- Name: Home Hepa Air Purifier
- Feature: Sleep Mode
- Control: Touch Control Panel
- Voltage (V): 100-240V 50/60 Hz
- Type: Hepa-Filter
- OEM&ODM: OK
- Highlight: quiet night hepa filter air purifier,
hepa filter air purifier sleep mode

Product Description

Get to Know the KJ050GE - C7: Your Small - Space Air Purification Helper

Sick of stale air in your small space? The KJ050GE - C7 is here to help! With its compact $\phi 200 \times H254$ mm size, it fits easily in 6 - 10 square - meter rooms like bedrooms or studies.

This air purifier packs a punch. It combines a Hepa filter with carbon and offers a True Hepa H13 upgrade. It zaps dust, pollen, and harmful particles, and also gets rid of bad odors and gases like formaldehyde. In a newly renovated office, a week of use made the paint smell disappear and formaldehyde levels drop.

Using it is easy. There are 3 - speed settings and a sleep mode that runs quietly at 55dB(A) max. You can set a 2, 4, or 8 - hour timer. It also has a filter - changing reminder, a soft night light, and a negative ion function.

Best of all, it's energy - friendly, using only 10.5W of power. So you can enjoy fresh air without high electricity bills. Don't let a small space stop you from breathing clean air. Get the KJ050GE - C7 today!

Product Specification

Model	KJ050GE-C7
Sound Level	≤ 55 dB(A)(Max)
Rated Power	10.5 W
CADR rate	50CFM (85m ³ /h)
Product size	$\phi 200 \times H254$ mm
Area coverage	6-10

Product Features

- Hepa filter with carbon (True Hepa H13 for option)
- 3 speeds and sleep mode
- 2,4,8hours timer setting
- Filter changing reminder
- Night light
- Quietly operates throughout the night
- Negative ions for option

Hepa Filter Working Principle

Hepa filtration is a commonly used filtration technology in air purifiers. The Hepa filter is composed of very fine organic fibers interwoven together, has a strong ability to capture fine particles, has tiny pores, a large adsorption capacity, and a high purification efficiency.

The working principle of the Hepa filter is that when the air containing dust particles passes through the Hepa filter, the suspended particles in the air will be blocked outside, thereby playing the role of filtering and purifying the air. It can effectively filter particles of 0.3 microns in the air. The filtering effect on particles $\geq 0.3\mu\text{m}$ can reach 99.9%, and the filtering effect on PM0.1 particles can reach 99.99%.

The higher the grade of the Hepa filter, the better the filtering effect. Generally, air purifiers on the market use filter elements of grades H12 and H13. Hepa filters can also be combined with other filtration technologies, such as activated carbon filtration, to improve the performance of the air purifier.

KJ050GE-C7 HEPA-type filter

Pre-filter block large airborne pollutants
HEPA filter kills more than 99.5% of tiny air borne pollutants
Activated Carbon filter target smells and smoke
